# THE 2017 ANNUAL MEETING

RICHMOND VIRGINIA  
MAY 9TH-10TH

## Is America's Health Care Financially Sustainable?

One of, if not the most concerning problem in health care today is *per unit costs*. There is an abundance of evidence which shows that Americans pay more per unit than any other country. The result is an unsustainable health care supply chain. VAHP's Annual Meeting will focus on the trends in these health care costs in every sector of business and the way our Managed Care and commercial plans are attempting to deal with these increasing costs.
